

Get Started with Home Control in 3 Easy Steps

SmartLinc is a web-based device that connects to your router and plugs into a wall outlet. It talks to devices such as wall switches, plug-in modules, outlets, thermostats that are INSTEON compatible. [Learn more about INSTEON.](#)

New to Home Control?

If you are new to home control you'll be happy to know that setup and installation is incredibly easy. Most people start by replacing a few wall switches and adding plug-in modules to their lamps. In these cases setup can be done on a Saturday afternoon and the convenience of being able to control you home from anywhere lasts a lifetime.

Essential Info

Nearly everything in your life is accessible from your Smartphone. But what about accessing your home? Wouldn't it be great to check to see if you left a light on or if you remembered to lock the front door? Or how about adjusting the thermostat or getting the spa ready for when you come home?

SmartLinc gives you all this control and is accessible both inside and outside your home from any web-enabled devices such as smartphones, computers, game consoles and tablets.

With SmartLinc you can control nearly everything in your home including [wall switches](#), [plug-in lamps or appliances](#), [thermostats](#) and [pool/spa pumps](#). You can even [control a TV or other A/V gear](#) or [read energy consumption](#) from an appliance.

- Turn your smartphone or computer into a remote control for your home
- Get status and control your lighting, appliances and temperature from anywhere in the world
- Built-in scheduler lets you set timed events for things like landscape lighting, pool or spa and more
