

## The Seven Metals

Alchemy employs seven metals, each one associated the seven colors of the rainbow, as well as the seven spirit, energy centers. These metals represent actual physical substances in the body as well as aspects of the mind and emotions.

Gold – A native ore with some silver, copper, and iron;  
Highly metallic (does not tarnish)

Crystal System: Isometric

Properties: All crystals, gems, and minerals are compatible with gold ore.  
The Perfect Metal – its energy initiates and motivates  
Excites the masculine aspect of human nature  
Dynamic and projective influence, malleable transmitter of spirit energy

Silver – A native mineral ore often with much gold or mercury, and lesser arsenic and antimony;

Crystal System: Isometric

Properties: All crystals, gems and minerals are compatible with silver ore.  
Feminine Energy, introspective, enhances ability receptive and intuitive.

Mercury - (Quicksilver, Cinnabar)

Crystal System: Hexagonal

Properties: Quicksilver (native mercury) is heavy liquid;  
Cinnabar the principle ore of mercury is comprised of Mercury Sulphide  
HIGHLY POISONOUS :

- Must be kept in thick layered glass
- Dangerous to ingest, touch or even breath

Copper - A native mineral ore, bismuth, iron and silver, often w/ small amt of arsenic, antimony;

Crystal System: Isometric

Properties: copper color, may tarnish black, blue, green  
Exceptionally good transmitter

Iron - (Hematite)

Crystal System: Hexagonal

Properties: Hematite is the principle ore of iron, is comprised of iron oxide  
Strong Grounding influence

Tin - (cassiterite)  
Crystal system: tetragonal  
Properties: cassiterite the principle ore of tin, comprise of tin oxide, often with some iron  
Have reached a plateau in evolutionary development  
Affects prosperity and growth  
Can be used to erase passive-aggressive behavior patterns  
Can bring increase to material, emotional, and spiritual

Lead - (Galena)  
Crystal system: Isometric  
Properties: Galena, the principle ore of lead, comprised of lead sulphide  
Transmit sound and light frequencies.  
Stabilizes mind amd bring thoughts back into focus  
Native lead teaches – acceptance of our limitations  
CAUTION: Lead should Not be handles or contact w/ skin, its toxic in nature.

Uraninite -  
Crystal System: Isometric  
Properties: comprised of uranium oxide, often w/ substantial amt of Thorium  
The Head Center  
Initiating substance that promotes ecology and conscious integration of the heart & Mind.  
Strongly influence mental activity toward humanitarian pursuits.

Platinum –  
Crystal system: Isometric  
Properties: A native ore w/ minor amt iridium, osmium, rhodium and palladium,  
As well as, iron, copper, gold, or nickel  
The Throat Center  
Electromagnetic energy field of platinum induces emotional refinement and assist  
In cleaning impurities from the aura  
Platinum is compatible with all crystals, gems and minerals

Sulphur –  
Crystal system: Orthorhombis  
Properties: A native ore, contains small amt of selenium.  
Non-metalic ore sometime forms as a result of acid water on metallic sulphates  
May assist in altering the atomic structure of the cells in the body  
May bring about exteme transformations anf change

NEW MILLENIUM METALS: Uranium, Neptunium, Plutonium HIGH DANGEROUS, illegal substances
